Process Map(s)

Process: Product Documentation

Overview: The process map for Product Documentation cycles through the following process and review activities:

DOC-01 Maintain Version Description Document (VDD)

DOC-02 Maintain Project Management Plan

DOC-03 Create Deployment, Installation, Back-Out, and Rollback Guide

DOC-04 Create Technical Manual or Production Operations Manual (POM)

DOC-05 Create User Guide(s)

DOC-06 GUI or Web-based Software?

DOC-07 Create Online Help for GUI and Web-based Software

DOC-08 Conduct Peer Review of Product Documentation

DOC-09 Conduct Formal Review of Product Documentation

Product Documentation Description and Goals

Description

This process provides required artifacts for Veteran-Focused Integration Process (VIP). It ensures necessary documentation is developed according to standards and best practices and is accurate, complete, and clear for both internal teams and end users for continued development and sustainment efforts.

Goals

- Maintain Version Description Document (VDD)
- Maintain Project Management Plan (PMP)
- Create Deployment, Installation, Back-Out, and Rollback Guide
- Create Production Operations Manual (POM) or Technical Manual (for VistA applications)
- Create User Guide(s)
- Create Online Help (optional)

Product Documentation RACI Information

The following describes the RACI information for this process:

DOC-01 Maintain Version Description Document (VDD)

Responsible Role: Configuration Manager

Accountable Role: Project Manager

Consulted Role: Technical Writer

Informed Role: Project Team; Stakeholders; Release Manager; Developer

DOC-02 Maintain Project Management Plan

Responsible Role: Project Manager

Accountable Role: Program Manager

Consulted Role: Technical Writer; Stakeholders

Informed Role: Project Team

DOC-03 Create Deployment, Installation, Back-Out, and Rollback Guide

Responsible Role: Technical Writer

Accountable Role: Project Manager

Consulted Role: Developer; Software Quality Assurance Analyst

Informed Role: Project Team; Release Manager; Stakeholders

DOC-04 Create Technical Manual or Production Operations Manual (POM)

Responsible Role: Technical Writer

Accountable Role: Project Manager

Consulted Role: Software Quality Assurance Analyst; Developer

Informed Role: Project Team; Release Manager; Stakeholders

DOC-05 Create User Guide(s)

Responsible Role: Technical Writer

Accountable Role: Project Manager

Consulted Role: Software Quality Assurance Analyst; Developer; Project Team; Stakeholders

Informed Role: Release Manager

DOC-06 GUI or Web-based Software?

Responsible Role: Technical Writer

Accountable Role: Project Manager

Consulted Role: None Listed

Informed Role: None Listed

DOC-07 Create Online Help for GUI and Web-based Software

Responsible Role: Technical Writer

Accountable Role: Project Manager

Consulted Role: Developer; Software Quality Assurance Analyst

Informed Role: Project Team; Release Manager; Stakeholders

DOC-08 Conduct Peer Review of Product Documentation

Responsible Role: Project Manager

Accountable Role: Program Executive Officer

Consulted Role: Project Team; Stakeholders

Informed Role: Release Manager

DOC-09 Conduct Formal Review of Product Documentation

Responsible Role: Software Quality Assurance Analyst

Accountable Role: Project Manager

Consulted Role: Project Team; Stakeholders

Informed Role: Release Manager

DOC-08 Conduct Peer Review of Product Documentation

Description

The Technical Writer creates the Deployment, Installation, Back-Out, and Rollback Guide, which is a required document for national releases of products/patches to be installed on multiple platforms (e.g., client/server installations). This artifact provides the information necessary to install the software with little or no assistance from the software developers or support staff as well as troubleshooting, back-out and rollback instructions. Installation procedures are a required

component and must be accessible according to the "Section 508 Standards for Electronic and Information Technology Accessibility" section 1194.41. These artifacts are included in the final overall Release Package.

If this product is an enhancement to an existing product, the current Deployment, Installation, Back-Out, and Rollback Guide is updated.

For the initial distribution of software, Release Notes are optional. Revisions to a product that involve major changes to technical specifications or end-user functionality (e.g., new version releases) require Release Notes. Changes to software or documentation that have a minimal impact (e.g., small scope patches) do not require Release Notes. The project manager, as the authoritative source and in consultation with the technical writer, determines if a Release Notes document is a required artifact for the project.

Previous Activities

Process Begins

Next Activities

DOC-08 Conduct Peer Review of Product Documentation

Description

The Technical Writer defines the Technical Manual or Production Operations Manual (POM) as routine operations. The Technical Manual, for Veterans Health Information Systems and Technology Architecture (VistA) products, or POM, for non-VistA products, provides sufficient

technical information about the software for developers and technical personnel to operate and maintain the software with only minimal assistance from the product support personnel.

The intended audience for this documentation is software support, management, and development personnel for nationally released software. If this product is an enhancement to an existing product, the current Technical Manual or Production Operations Manual (POM) will most likely be updated.

The POM is not published to the VA Software Document Library (VDL), but the Technical Manual is published to the VDL.

Input

Deployment, Installation, Back-Out, and Rollback Guide

Output

Technical Manual or Production Operations Manual (POM)

Next Activities

DOC-08 Conduct Peer Review of Product Documentation

Description

The Technical Writer creates a user guide, which is a required documentation component. Multiple User Guides can be produced for any given software (for example: Setup Guide, Deployment Guide, Developer Guide, etc.). This guide is included in the final overall Release Package. User Guides for distinct user audiences can either include separate sections or comprise separate documents specific to the audience (e.g., nurses, pharmacists, technicians, developers, etc.).

If this product is an enhancement to an existing product, the current User Guide(s) will most likely be updated.

DOC-09 Conduct Formal Review of Product Documentation

Description

The Project Manager conducts the Product Documentation Peer Review performing the following general steps:

1. Distribute the Peer Review Materials
2. Review the Peer Review Materials
3. Distribute the Consolidated Peer Review Findings
4. Record the Finding Resolutions
5. Implement the Finding Resolutions

The goal of the peer review of the Product Documentation is to resolve any questions the project team may have and to ensure the quality of the deliverable.
